

SPINNER® Climber™

INDOOR CYCLE

With the aesthetic appeal and lasting durability of an aluminum frame, the Spinner® Climber™ bike by Precor is the answer for operators aiming to enhance their non-power based classes with a premium indoor cycle, supported by industry-leading innovation, education, and service.

When you include the Spinner® Climber™ in your indoor cycling program, you'll delight your riders with premium features including magnetic resistance, Kevlar® reinforced timing belt, and the iconic feel of the Spinner® perimeter-weighted flywheel. The Spinner® Climber™ has the option to add the Studio Console, which is compatible with most leaderboard solutions on the market.

Like every bike in the Spinner® line, the Spinner® Climber™ is backed by world class programming and educational support from Spinning® to further enhance the experience your facility's indoor cycle program offers to riders.

SPINNER® Climb™

1 Aluminum Frame

The all-aluminum frame features rounded tubing to shed sweat and offers the best corrosion resistance. The stamped frame elements shield and protect components while giving a high quality design appearance.

2 Magnetic Resistance

The patent-pending resistance mechanism delivers an equal increase with every turn of the knob without sudden jumps in resistance. The unique caliper design specifically accommodates the heavy perimeter weighted flywheel that delivers the iconic Spinner® feel.

3 Timing Belt Drive

Designed with a Kevlar® reinforced, cogged timing belt for more efficient power transfer from the rider. Our lowest maintenance belt features a 10-year warranty.

4 Adjustments

Micro-adjustable fore-aft seat and handle bar adjustments, height adjustments, and oversized asymmetric pop-pin knobs provide an easy-to-use and personalized fit for riders of all sizes.

5 Rust Resistance

Thoughtful design elements, like nylon leveling feet, make the Spinner® Climb™ rust resistant and easy to own.

CONSOLE

The easy-to-read Spinning® Studio console can be added to the Spinner® Climb™. This Spinning® console technology will automatically pair with any ANT+™ compatible heart rate monitor, and also features low power consumption, a large backlit display, and code memory during battery replacement.

READOUT INCLUDES:

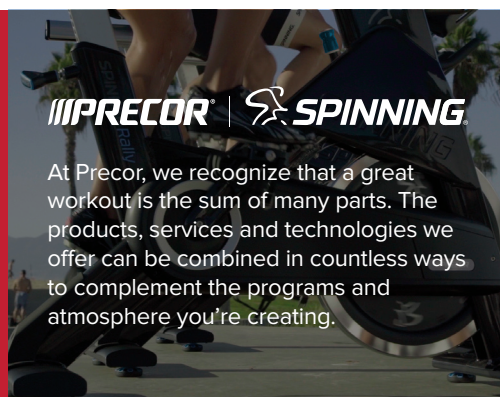

- Cadence (Pedal RPM)
- Heart Rate/Pulse*
- Time
- Distance
- Calories
- Low Battery Indicator

*When heart rate monitor is in use
