

P82

TOUCHSCREEN CONSOLE

Product Highlights

The premium P82 touchscreen console is available on Precor Experience™ Series 600, 700 and 800 Line cardio equipment. It is designed to be the ideal portal to Preva® networked fitness, providing exercisers a personalized and compelling workout experience that can be tracked, saved, and re-accessed. Preva also provides you with powerful tools that increase attraction, improve retention, drive revenue, and optimize your cardio equipment management.

Product Features

Designed for Fitness Environments

The P82 design allows exercisers to keep their head, neck and shoulders in an upright and natural position. The simple layout makes it easy for exercisers to start and control their workout, be entertained, stay engaged and achieve results.

Smart Watch Connector for Apple® Watch

With the optional Smart Watch Connector, exercisers can connect their Apple Watch to the P82 console to seamlessly sync metrics like speed and distance with heart rate and calories burned for real time, accurate measurement. Available factory-installed or as a field-installed retrofit kit.

Customize, Communicate & Entertain

The Preva operating system features easy-to-use tools to rebrand the cardio screens, communicate with members, add the EGYM app to share prescriptive workouts with exercisers, and provide engaging entertainment with apps such as the free On Demand service from Precor, Netflix®, and Spotify®.

Integrated Asset Management

Connected equipment gets the full benefit of Preva Business Suite. Save time and effort with easy-to-access diagnostics and usage information for all of your connected facilities in one easy-to-access online portal.

Supports Media Technologies Around the World

Easily connect standard media systems, cable/satellite receivers, Pro:Idiom, and IPTV. The P62 is designed with today's media technologies in mind.

Warranty: Visit www.precor.com/warranty

*Supported through a set-top-box receiver.

PRECOR® SMART WATCH CONNECTOR FOR APPLE WATCH®

The Precor® Smart Watch Connector, an option for the P82 console, leverages Apple® GymKit™ to connect Precor cardio equipment to an exerciser's Apple Watch® to track important metrics like heart rate, speed, and calories on Apple Watch. It is available as a factory-installed upgrade to a new P82 console or a field-installed retrofit to an existing P82 console.

Exercisers simply hold their Apple Watch near the Connector to confirm their connection. Exercisers can also tap their Apple Watch to the Connector at any time during their workout and get information for everything that happened up to that point.

Apple Watch collects heart rate information and calculates calorie expenditure and sends it to the P82 console for display. The console provides the speed and distance traveled enabling exercisers to view important metrics like heart rate, speed, elevation, and calories in the Activity app on Apple Watch or the Fitness app on iPhone.

To give you choice and flexibility, the Smart Watch Connector is available across all *three* Precor cardio lines with P82: 880, 780 or 680. This includes treadmills, ellipticals, our exclusive Adaptive Motion Trainer, recumbent and upright bikes.

Specifications

Qualifying cardio lines and models:

880 Line: TRM, EFX, AMT, RBK, UBK

780 Line: TRM, EFX, AMT

680 Line: TRM, EFX, RBK, UBK

Networking requirements: P82 console does not need to be networked to support the Smart Watch Connector

To use the Smart Watch Connector, exercisers will need:

Apple Watch Series 2 or later and watchOS 4.1 or newer
