

THE MARS 2.0 SCREEN.

MULTI-ACTIVITY RESOURCE STATION.

ANY GYM. ANY ABILITY. ANYWHERE.

IN-GYM COACHING: THE NEXT GENERATION.

Offer any time access to high quality exercise and equipment instruction and demonstration.

For gyms where in-person instruction is not always possible such as those in hotels, residential buildings and corporate gyms, the new Multi Activity Resource Station (MARS 2.0) offers round the clock support, bridging the gap between education and equipment to create an inclusive environment that everyone can enjoy, on every visit.

Clicking on the high-definition touchscreen unlocks a huge selection of engaging fitness content from individual exercise and equipment demonstrations to full-on workouts. Operators have the option at point of purchase to choose the content they want to show to create a resource library that mirrors the equipment available, creating a highly bespoke experience for every user.

MARS 2.0 has the back of every user on every visit, creating a fully supported training experience for everyone.

INSTALLATION AND ACTIVATION.

MARS 2.0 has been specifically designed to attach to a selection of Octagon frames, creating a gym-floor centrepiece that ensures easy-access to instruction is available around the clock for the benefit of all.

To activate MARS 2.0 and access this 24-hour digital coaching support, all that is needed is an internet connection and a plug making it an ideal, cost-effective, addition to any training space. Regular content updates are uploaded by the in-house Escape team to reflect new equipment innovations and market trends. This will ensure content is always fresh, and inspiring, encouraging users and instructors to push themselves to their limits.

CHOOSE FROM FOUR OPTIONS.

01

SOLO MARS 2.0 SCREEN.

Create a focal point in any fitness space with a stand-alone MARS screen, attached to a wall using a bracket*.

*bracket to be purchased separately.

02

MARS 2.0 RACK PACK.

A complete package, the MARS RACK PACK consists of two RACK5 units, fully-stocked with Escape equipment and the MARS screen as the centerpiece.

03

MARS 2.0 ON AN OCTAGON LEG.

Easily visible and accessible, a MARS screen can be mounted on any Octagon frame leg at around 1.5m / 4.9 ft from the floor with the MARS screen as the centerpiece.

04

MARS 2.0 ON AN OCTAGON FRAME.

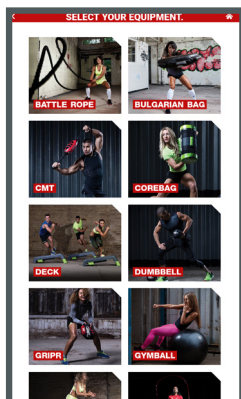

Aesthetically-pleasing and practical, a MARS screen beam creates a focus point of any Octagon frame.

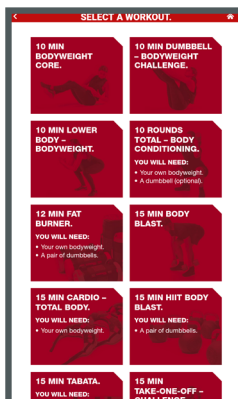

ONE INSTALLATION – UNLIMITED EXPERIENCE.

Installing MARS 2.0 instantly injects a high quality, 'always on' coaching function into your facility, encouraging everyone to get the most out of their training session on every visit. With MARS 2.0, everyone's coaching needs are catered for - from the complete beginner to the seasoned athlete. Nobody needs to train alone. Everyone can experience a highly bespoke, coached session even in a training facility they are visiting for the very first time.
