

Plate-Loaded Line BELT SQUAT

Featuring the highest quality construction and presentation that Dynamic Fitness & Strength offers, the belt squat machine is a great squat accessory piece to add to your program. It takes the load off the shoulders, thus reducing axial loading of the spine, instead distributing the load around the waist by use of the belt. A great addition to your lower body and squat pattern movements.

Features:

- Large Working Platform
- Multiple Training Options
- Intensive Multi-Stage Pretreatment Process for Long-Lasting Powder-Coat Finish

Bumper plates shown for display purposes only.
Not included with unit.
