# CURVE FTG

## spec sheet

## resistance

The CURVE FTG has 20 resistance levels. Resistance can be increased at a gradual pace, creating longer runs at higher speeds. The surrounding hand rail provides push points for users of all size and strength. Sled push, squat walk, parachute run, and much more - the opportunities are endless.

## better performance

Our products are designed to reinforce proper running form. The curvature on this product is also designed to limit stress on your lower limbs, particularly the achilles, when using resistance mode. We believe sound technique and form equals better performance.

## 40 year legacy

The CURVE FTG may be the newest addition to the CURVE series, but we have built solution driven products with our customers for over 40 years. Our belief in customer relationships and the expertise they provide, along with the original slat-belt, puts our product ahead of the competition.

**human powered**

**20 levels of resistance**

**energy efficient**

## quick specs

- total dimensions: 74" L x 33" W x 73" H
- running surface: 67" L x 17" W
- speed: unlimited
- curvature: ≈ 3%
- unit weight: 350 lbs.
